# About John Crane

- Founded more than 100 years ago, John Crane is a global leader in mission-critical technologies for the energy and process industries and an innovator in rotating equipment, encompassing mechanical seals, couplings, filtration systems and cutting-edge asset management and digital diagnostics solutions.
- John Crane designs and manufactures a variety of products, including mechanical seals and systems, couplings, filtration systems and digital diagnostics technologies.
- Customer service is accessed through a global network of more than 200 sales and service facilities in over 50 countries.
- John Crane is part of Smiths Group, a global leader in applying advanced technologies for markets in threat and contraband detection, energy, communications, and engineered components.

## Our Vision

Be a global leader in the design, manufacture, installation and support of rotating equipment solutions that drive efficiency, safety, and environmental sustainability in large-scale industrial processes.

## Our Mission

We pioneer mission-critical technologies and services for the energy and process industries that enable efficient and sustainable operations.

# Global Network and Technical Expertise

**200** Sites in more than 50 countries - largest service footprint

**163** Sales and service centers

**35** Manufacturing Sites

**453** CNC machine tools around the world

**9** Engineering and R&D global hubs

**115** Test rigs globally
